

Design Analyzer

Design Analyzer

1.0 Purpose

The VehicleFORGE **Design Analyzer** is the online version of the **Dashboard**.

2.0 How to Access

The Design Analyzer can be invoked from the VehicleFORGE/Project Navigator.

3.0 Use

To overview/analyze designs on VehicleFORGE, you have to:

- Upload designs to your Team's repository
- Go to your Team's **Project Navigator** (should be accessible through the sidebar of your Team home) and find the project/design you have uploaded
- If you want to open an entire project to analyze, just locate the CyPhy project with its designs on the bottom of the screen and click on its file name
- If you want to merge together designs from separate CyPhy projects, focus on filtering the collection on the top part of the screen. Once you have the right selection of designs, click on the action button to get to the design a analyzer (Dashboard)
